

How to Protect Your Data with Cloud Backup

Lisa Louise Cooke
The Genealogy Gems Podcast
www.GenealogyGems.com

Your digital genealogy files are invaluable! Don't wait another day to protect them.

Old School Method: "It's the end of the month, time to back up."

The problem is, an external hard drive is still in your house. If disaster strikes, it will be in the same location as your computer. External hard drives can also break, or you can lose them.

New Tech Method: Set it and forget it!

A Cloud backup service:

- Automatically and continually backs up your files. You don't have to do anything.
- Keeps multiple copies (redundant backup is very important.)
- Is located offsite, outside of your home.

I recommend Backblaze Cloud backup service

About Backblaze:

- Over 10 Billion Files Restored, and over 150 Petabytes of data backed up
- #1 online backup service by About.com
- Backups up all files – even video!
- Will back up an external hard drive too
- No file size limits
- Unthrottled back up speed
- Restores all your file and folders
- Can locate your computer if lost or stolen
- Can be secured with a password
- Offers multiple options for restoring your data
- Free mobile app giving you access to your files, even if your computer is turned off
